Main Lines of Business

@_qga@sgjbgle K_rcpg_jq

Cement, Cement +

The production scale of cement and commercial concrete ranks first in the world, with 334 new dry process cement production lines, cement capacity of over 500 million tons and commercial concrete capacity of about 440 million cubic meters. As the standard configuration for the city, 53 cement kiln cooperative disposal production lines have been put into operation and under construction. The total annual disposal scale is 5.42 million tons, and the landfills are reduced by 1,355 mu. The installed capacity of waste heat power generation of cement sheeting is about 2000 MW.

Icw c l rcpnpgqcq

Tianshan Material Co., Ltd., North Cement Co., Ltd., and Ningxia Building Materials Group Co., Ltd.

Lcu K_rcpg_jq

Lightweight building materials

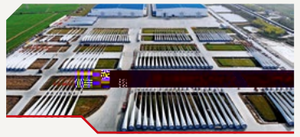
The plasterboard production capacity is 3.5 billion square meters, ranking first in the world. There are 92 production bases globally. It has 4,852 valid patents. The business scale of waterproof materials ranks among the top three in the industry. It has 15 waterproof material production bases, 74 waterproof membrane production lines and 34 waterproof coating production lines. We develop the business of "plasterboard+" supporting systems, and serve national key projects such as the Great Hall of the People, the Olympic Games and the Winter Olympics. We promote the global original "Luban" universal board whole house assembly system, and actively develop waterproof materials and coatings that can be installed and brushed immediately and allow immediate occupancy, creating a low-carbon, environment-friendly and healthy indoor environment. Taking plasterboards as the leading product, we have gradually developed the global layout of the whole product lines.

Key enterprises

Beijing New Building Material Public Limited Company, Taishan Gypsum Co., Ltd., and BNBM Waterproofing Co., Ltd.

Fiberglass

The production capacity exceeds 3.7 million tons, ranking first in the world; the global market share exceeds 40%. Nine production bases have been built, covering China, Egypt, the United States and other places. We have the oxygen-combustion large pool kiln wiredrawing intelligent production technology and equipment with fully independent intellectual property rights. We have built the first zero-carbon intelligent manufacturing base, developed more than 3,000 specifications and varieties in over 20 categories such as high-mode high-strength fiberglass, and low dielectric fiberglass, which are applied to high-end equipment, new energy, 5G communication and ocean engineering. The products are sold to more than 100 countries and regions around the world, and have won the "China Grand Awards for Industry" and "China Patent Gold Award".



Wind Turbine Blade

We are the world's largest wind turbine blade design, research and development, manufacturing and service provider, with a production capacity of about 30GW. Our products cover the mainstream unit platforms from 1MW to 16MW+. The "SinomaBlade" brand has been firmly established in the industry. The market share in China exceeds 30%. Globally cumulative installed capacity is 153GW. The products operate stably in 42 countries including China, Austria, Pakistan, Chile and Brazil. In 2023, we developed the longest 130 m 12 MW carbon fiber girder composite blade and the longest 101 m 6-8 MW all-fiberglass onshore blade in China.

High-quality Float Glass

Our production capacity ranks among the top five in China, and we have a second-generation float glass intelligent demonstration line with fully independent intellectual property rights. The products include body-colored glass, Low-E coated glass, insulated glass, vacuum glass, and smart light-control glass, which are applied in various fields such as architecture, automobiles, household appliances, photovoltaic, and mirror manufacturing, and are sold to nearly 100 countries and regions in Southeast Asia, Europe, and South America.

Carbon Fiber

Driven by domestic independent technological innovation, we build a carbon fiber business segment, with a production capacity of 58,500 tons (28,500 tons completed). The domestic market share of high-performance carbon fibers of T700 level and above has exceeded 50% for consecutive years. It is widely used in fields such as aerospace, new energy industries, and major infrastructure projects. It has won the "First Prize of National Science and Technology Progress" and "Top Ten Super Projects of Central Enterprises".

New Glass Materials

We have achieved a series of industrialization achievements that are "the first in China and the best in the world". We have independently built the world's largest single-unit oxygen-fuel combustion photovoltaic glass production line, and the first thin and high-transmittance photovoltaic glass intelligent production line in China. We have successfully rolled out the world's first large-area cadmium telluride power glass. The photoelectric conversion rate of copper indium gallium selenium power glass has set a new world record. The world's largest single-unit thin film BIPV application demonstration project has been built and applied in multiple scenarios. We have independently developed China's first neutral borosilicate phar hav enM s /hares elofu ut

Lithium Battery Separator

We are the high-tech enterprise in the industry that takes the lead in simultaneously having the wet synchronous and asynchronous stretching processes for high-performance lithium battery separators. The existing production capacity exceeds 4 billion square meters, and the under-construction production capacity exceeds 2 billion square meters. We have laid out seven production bases and one equipment manufacturing base across the country. The products cover 3-12 μm wet separator and various coated separator products, which are used in new energy vehicle power batteries, 3C consumer batteries, energy storage batteries and other fields. The development rate among the top ten global battery customers reaches 90%.

Cleglccpgle_lb Rcaflga_j Qcptgacq

Kmtglermu_pbqglImt_rgml*qagclrg a _lbrcaflmjmega_jglImt_rgml gelgrcq rfcclеglc md fgef+os_jgrw bctcjmnkclr

Accelerating the development of new quality productive forces is the strategic planning made by General Secretary Xi Jinping from a new historical starting point to promote high-quality economic development. As a leading enterprise in the building materials industry among the Fortune Global 500, CNBM focuses on accelerating the formation of new quality productive forces and actively leverages the innovation strength of 26 national-level research and design institutes, 3 national-level key laboratories, and 8 national-level engineering (technology) research centers.

We support the formation of a new material industrial system with a hierarchical layout of RMB 1 billion-RMB 5 billion-RMB 10 billion. We improve our core competitiveness through technological innovation, enhance our core functions through industrial innovation, and give better play to the role of technological innovation, industrial control and safety support. We help build a modern industrial system that is integrated, advanced and safe. We give full play to the role of state-owned capital investment companies, and continuously enhance our core competitiveness and core functions, providing vivid samples for exploring the future path of new quality productive forces.

In order to further strengthen the coordinated layout of the industry chain in the investment project, actively build an innovation ecosystem for the

We have completed the restructuring and integration of Qilianshan Cement, wind turbine blades, equipment manufacturing, coatings and other businesses; New Materials Fund was selected as one of the top 30 investment institutions in the field of new energy/new materials in China in 2023, and raised a total of RMB 6 to 8 billion of capital for the Group.

Qrpmlecpqagclrg a_lbrcaflmjmega_jglImt_rgml a_n_agrw

New breakthroughs were made in the construction of the source of original technologies; six national key R&D plans were undertaken; seven projects in the second phase of the "1025" project were carried out on schedule; the first phase of the Group's "open competition mechanism" project was evaluated and the second phase was launched. A 25,000-ton high-performance carbon fiber production base with the largest single capacity in the world was built; a number of original R&D results, such as T1,100 carbon fiber and 70MPa hydrogen storage cylinders, were transformed into demonstration projects.

The thirty two 320L hydrogen cylinders independently developed by Sinoma Science & Technology (Suzhou) Co., Ltd. and certified by the classification society, were applied to the "Three Gorges Hydrogen Boat No. 1", the first 500 kW hydrogen fuel cell-powered workboat in China to be classified by the China Classification Society (CCS). And this workboat was successfully launched.

Qrpmlecplbsqrpg_jamlrpmja_n_agrw

On April 8, 2023, the commencement ceremony of Zhongfu Shenying's 30,000 tons/year high-performance carbon fiber project was held in Lianyungang, Jiangsu Province. This project is another significant move by CNBM to further deepen and implement the domestic economic circulation strategy after the "super project" of 10,000-ton carbon fiber in Xining was completed and put into operation. As the world's largest single carbon fiber production base, this project will make full use of nuclear steam and photovoltaic power to achieve the green and low-carbon transformation of energy in the carbon fiber production process. Meanwhile, it will adopt the most advanced carbon fiber industrialization technology of version 4.0 in China for the design of the new base. After the new base is completed and put into operation, it will further enhance the large-scale application of domestic high-performance carbon fiber products in fields such as aerospace and new energy. While promoting the integration of the innovation chain and the industry chain, it will also contribute to building China into a leading country in manufacturing, product quality and materials.

Qrpmlecpq_dcrwqsnnmpra_n_agrw

The annual revenue of special new materials exceeded RMB 2.4 billion; breakthroughs were made in numerous "bottleneck" technologies such as low-carbon cement, large aircraft carbon fiber composites, and high-level radioactive waste liquid glass curing materials. Nearly RMB 3 billion was invested in "the pain points of central enterprises", such as the integrated circuit and semiconductor industries.

The report of the 20th CPC National Congress proposed for the first time to accelerate the construction of a modern industrial system and place the focus of economic development on the real economy. The materials industry is the foundation of the real economy and occupies a fundamental position in the modern industrial system, serving as the basis for the development of the national economy.

As the only central enterprise in the building materials industry, CNBM has adhered to driving industrial innovation through technological innovation and made efforts in both basic building materials and strategic emerging industries.

The Group has accelerated the transformation and upgrading of traditional industries while speeding up the deployment of strategic emerging industries. It has accelerated the deployment of new fields and new tracks for value creation, focused on the proactive deployment of future-oriented industries, actively acted as the "vanguard" of building the modern industrial system, consolidated the modern industrial system supported by the real economy, created advantageous industrial clusters with core competitiveness, fostered new drivers and advantages for development and strived to build world-class enterprises.

Responsibility Window

CNBM takes the lead in joining forces with 17 institutions to jointly invest in the establishment of CNBM New Materials Fund with a total fund size of RMB 20 billion and an initial fund size of RMB 15 billion. This is an important part of CNBM to lay out the material industry as a state-owned capital investment company. The fund is positioned to solve the "bottleneck" technology of new materials, to ensure the safety and independent substitution of the new material industry chain, to promote scientific and technological innovation and breakthroughs in key core technologies, to cooperate with investors to cultivate the industrial ecology, and to focus on investing in the field of new materials.

Bctcjmn qrp_rcega ck cpegle glbsqrpgcq _lb dsrspc+mpgc lrcb glbsqrpgcq

By actively leveraging its role as a state-owned capital investment company, CNBM has continuously enhanced its supportive and stabilizing capabilities in key areas such as new materials and new energy, and combined its "9+6" systematic layout to complete the mid-term assessment and adjustment of the "14th Five Year Plan" development strategy and draft a work plan for its new and future-oriented industries. It has allocated 16 tasks in four major areas of new materials, new energy, and industrial machine tools in its strategic emerging industries layout, and six key technologies in five major areas in its future-oriented industries layout.

Unprecedented strategic emerging industries and future industrial layout

- The Huai'an zero-carbon intelligent manufacturing base of China Jushi and the Taiyuan base of Taishan Fiberglass commenced construction.
- The production capacity at Zhongfu Shenying's Xining base phase II doubled.
- The Lianyungang commenced construction.
- The Nanjing, Pingxiang and Yibin bases of Sinoma Lithium Battery Separator achieved sales ahead of schedule.
- The Inner Mongolia Phase II and Tengzhou Phase II of Sinoma Lithium Battery Separator were put into operation.
- The Yiwu, Yulin and Yangjiang bases of Sinoma Wind Power Blade Co., Ltd. had a production capacity of 3.14GW.
- Triumph Science & Technology acquired three power glass production lines in Handan, Jiamusi and Zhuzhou through equity financing of RMB 950 million.
- The construction of Qinhuangdao and Luoyang photovoltaic glass base was accelerated.
- The Photonic Material Industrial Park of China Building Materials Academy was completed and put into operation.
- Sinoma Advanced Materials produced 180 tons of silicon nitride bearing balls and 700,000 high-thermal-conductivity substrates per year.

New materials emerged, forging advantages

In 2023, CNBM continued to accelerate the formation of new quality productive forces, with new materials emerging. Nine major materials were selected for CCTV's large industrial documentary "Pillars of Material", becoming samples of Chinese materials participating in global competition.

As a large state-owned enterprise, CNBM stands shoulder to shoulder with the times and walks with the country. As the vanguard of "going global" in China's building materials industry, CNBM has continuously deepened its presence overseas, actively participated in Belt and Road construction, competed with the world's leading enterprises in the industry, and built about 500 high-level and high-quality cement and glass engineering service projects in the world, with the market share ranking first in the world. It has created a series of international business cards with world influence.

CNBM has been "going global" since the 1990s. Relying on its increasingly robust technical and equipment capabilities, it has transformed from mainly exporting building materials to mainly exporting complete sets of building materials technology and equipment, and has undertaken the general contracting business of foreign engineering projects. It has innovatively created the EPC+ model, featuring Sinoma International Engineering Co., Ltd. and CTIEC as the main players. On the basis of integrating the entire system of technology R&D, engineering design, equipment manufacturing, construction installation, and technological transformation, it has actively expanded value-added services such as spare parts, operation & maintenance, and smart industrial services, achieving a shift from a single production line builder to a diversified engineering integration service provider. It has also established industrial parks overseas, exploring a new model of overseas development featuring "science & technology + industries + services", and has become an important participant in the global building materials industry.

Creating "new business card" for engineering service

CNBM makes every effort to consolidate its traditional advantages in the engineering technical service business, promotes globalization, localization and diversified development, takes serving the entire industry as its responsibility, and explores the service-oriented manufacturing industry through large-scale R&D service, Internet + service, inspection and certification, carbon trading services , EPC engineering services, smart industrial services, etc., so as to form the new growth pole with new economy, new model and new format. In 2023, the Group continued to consolidate and improve the engineering technical service sector, achieving an increase in the newly signed overseas contracts for engineering technical services by more than 40% year-on-year.

The 15MW air-cooled waste heat power generation project supporting the BASTAS Cement plant affiliated to the French VICAT Group contracted by Shanghai Triumph Energy Conservation Engineering Co., Ltd., (STEC) successfully passed the project acceptance

The Fauji (DG Khan) clinker cement production line with daily output of 6,500 tons in Pakistan, which was contracted by Hefei Cement Research & Design Institute corporation Ltd. (HCRDI), a subsidiary of SINOMA International Engineering Co., Ltd. (SINOMA International), and constructed by Sinoma (Handan), was successfully put into operation at one time.

Constructing "new model" for logistics trade

CNBM has constantly consolidated the new model of foreign trade, explored the establishment of a business model of "building materials and home furnishing chain supermarket + overseas warehouse" with building materials' characteristics, innovatively implemented "standardization + localization" cross-border logistics solutions, invested in the construction of 36 overseas warehouses and building materials supermarket chains in 14 countries including United Arab Emirates, Tanzania, South Africa, Papua New Guinea and Vietnam; created the comprehensive cross-border e-commerce service demonstration platform "okorder.com", built a link between upstream and downstream links of the product chain, and driven more than 30,000 kinds of products in China to go global, maintaining the stability of global industrial and supply chains; The wzcwlw.com digital logistics platform focuses on logistics services for manufacturing enterprises. It has completed the linkage with 599 cargo owner enterprises through the system integration, and has been selected into the 2023 National Big Data Application Demonstration Project of the Ministry of Industry and Information Technology of the People's Republic of China.

In 2023, the Group's logistics and trade sector developed steadily. CNBM invested in overseas warehouses and building materials supermarket chains, achieving revenue of RMB 4.66 billion, a year-on-year increase of 28%.

Action · 2023

- CNBM formulated guidance on medium- and long-term incentives and constraints, encouraging enterprises to try first and boldly explore, and comprehensively use various incentives including equity incentives, employee stock ownership of mixed-ownership enterprises, dividend incentives, excess profit sharing, project follow-up investment, phantom equity, etc., so as to mobilize employees' innovative impetus.
- CNBM divided scientific and technological achievements into categories A, B and C, and implemented incentives and transformations by classification, so that scientific researchers could "gain both fame and wealth".

Achievements · 2023

- Through the creation of an innovation system of "1+17" enterprise technology centers, the Group and its affiliated Sinoma Science & Technology Co., Ltd. and China Triumph International Engineering Co., Ltd. gained excellent evaluation results of the national enterprise technology centers in 2023.
- It promoted cross-border integration of innovation resources such as well-known universities and leading technology enterprises, and completed the reorganization plans of three national key laboratories.
- It secured the approval for the national defense technology innovation center of glass-based functional material , completed the construction of the Composites Industry Center, a part of National New Materials Testing and Evaluation Platform, and the national dual-carbon public service platform, obtained the license from the Ministry of Industry and Information Technology for the advanced inorganic non-metallic material industry center, and established the CNBM Technical Equipment (Hefei) Research Institute .
- With the creation of a "technology + industry + service" "Belt and Road" materials innovation model, it built overseas innovation platforms such as the China-Egypt joint laboratory for high-performance fibers and composites, which received praise from on-site inspections by the Ministry of Science and Technology.
- With the innovative implementation of the "113N" overseas new materials cooperation model, it confirmed the strategic cooperation framework agreement with Saudi Arabian Oil Company (Saudi Aramco) and offered new layouts of overseas innovation platforms such as the China-Middle East Joint Laboratory for New Materials, the China-France Carbon Neutrality Joint Research Center, and the China-Algeria Joint Laboratory for "Belt and Road" Materials.

Cultivating innovative talents

people were awarded the title of "Outstanding Chief Engineer in the Cement Industry in 2023"

T800 Carbon Fiber Prepreg Research and Development Team

In the early stage of the development of the T800 aviation prepreg project, there was a lack of performance testing equipment, insufficient knowledge of resin, and weak foundation of sample preparation and testing level. Through comprehensive study, professional and technical exchanges, research and inspection, the team members overcame one technical problem after another, promoted the smooth development of T800 aviation prepreg and toughened epoxy resin, and made huge breakthrough in T800 aerospace prepreg and 3rd-generation toughened epoxy resin project. CNBM's self-developed aviation toughened resin has a good match with SYT55G, and the key composite properties of the prepared prepreg reach the indicators of large aircraft.

We checked and dispatched the rectification situation of environmental protection inspections every month and compacted the responsibilities for inspection and rectification. All 46 rectification tasks and 180 rectification measures of the central ecological and environmental protection inspection had been completed.

We carried out special environmental protection rectification actions for enterprises related to the Yangtze River and Yellow River basins. A total of 258 problems were identified and rectified under ledger-based closed-loop management and control.

We organized 564 enterprises related to the Yangtze River and Yellow River basins to conduct a comprehensive inspection of ecological and environmental issues. A total of 211 issues were identified and all had been implemented for rectification.

Qrpc lerfcl npm`jc k emtcpl_lac

We deployed and carried out special ecological and environmental protection work such as rain and sewage diversion and investigation and rectification of hazardous waste. Preliminary results were achieved in rain and sewage diversion construction and compliant management of hazardous waste.

We promoted pollution reduction and carbon reduction, energy-saving technological transformation, and discharged pollutants in accordance with laws construc l

Npctclr cltgpml kclr_jpgqiq

We quickly responded to the sudden environmental public opinion event of LCR, handled it actively, stably and effectively, avoided the risk of negative public opinion, and received a letter of thanks from the Atmospheric Environment Department of the Ministry of Ecology and Environment.

Green Material Selection

We always adhere to the concept of "Making Good Use of Resources and Serving Construction". We actively carry out technological innovation. Under the premise of ensuring product quality, we use industrial by-products such as slag, steel slag and fly ash as raw materials as much as possible. We also continuously promote the recycling of solid waste and waste water, and strive to reduce the consumption of natural resources. In 2023, the Group's solid waste consumption exceeded 105 million tons. At the same time, in terms of energy selection, we vigorously develop cement waste heat power generation from cement kilns, actively explore the use of non-fossil energy sources such as solar energy and biomass, and strive to increase the proportion of clean energy use. By the end of 2023, the Group's cement waste heat power generation from cement kilns, with a cumulative installed capacity of about 2,000 megawatts. The annual power generation is 7.24 billion kilowatt-hours, which is equivalent to reducing carbon dioxide emissions by about 4.03 million tons.

Sinoma Wind Power Blade Co., Ltd. released the world's longest 118-meter wind turbine blade for "deserts, Gobi, and wastelands". This blade is made of recyclable high-performance environmentally friendly materials, which is of great significance for improving the service life of wind turbine blades and reducing environmental load. Scan the code to learn more.

Green Manufacturing

We actively implement the new development concept, take the lead in practicing the "dual carbon" goal, continuously establish and improve the green manufacturing system, strengthen the ecological environment management of member enterprises, strictly implement emission standards and requirements, develop clean and environmentally friendly energy sources such as photovoltaic, wind power, and hydrogen energy, continuously reduce pollutant emissions in the building materials production process, and promote the greening of the entire manufacturing process. At the same time, we actively innovate collaborative disposal and operation models, build a green supply chain and circulation system, and strive to achieve green and sustainable development of the entire industrial chain.

In 2023, we made great efforts to implement the Notice on Further Strengthening the Renewal and Transformation of Product Equipment in Key Fields. Centering on optimizing the energy consumption structure, improving energy consumption efficiency, and strengthening energy consumption management, we organized and promoted the implementation of energy-saving technological transformation and industrial energy-saving diagnosis, and the energy efficiency level continued to be optimized.

@_qga @sgjbg l e K_rcpg_jq Qcarmp

- We develop and use industrial waste resources as raw materials and high-calorie waste as alternative fuels to produce high-quality green and low-carbon cement products.

- We start from the source of formulations to do a good job in green design, vigorously dævelop n☒w d☒/in ca?

Green Products

We pay attention to the full life cycle performance of products in terms of green. Relying on technological innovation, we actively promote green manufacturing. With the lowest possible energy consumption and carbon emissions, we strive to create green and low-carbon "pillar of the country". We provide building materials products that are reliable in quality, safe, green, environmentally friendly and low-carbon for customers. Under the premise of ensuring product quality and transportation safety, we actively promote simplified packaging, use recyclable packaging materials as much as possible, and reduce packaging waste to help improve the effectiveness of sustainable development of the whole society.

In 2023, more than 10 projects involving green and low-carbon industries, such as the complete set of technology and engineering applications of thin-film solar cells and the development of large-sized offshore wind turbine blades, were carried out. We strengthened the R&D and application of low-carbon building material products such as new cementitious materials and low-carbon concrete, and accelerated the certification and application promotion of green building material products, leading the building materials industry to accelerate green transformation. The "refractory decorative board" and "medical clean board products" of Sinoma Qianjiang, as well as the asbestos-free calcium silicate board/fiber cement flat plate of Sinoma Yichang have obtained the three-star certification of China Green Building Materials products, reaching the highest national standard for green building materials products.

Professional Technical Services

We use high-efficiency and energy-saving firing system, pollutant emission reduction technology, waste heat power generation, cooperative disposal and other technologies to continuously provide some energy-saving and environmental protection technical services, such as professional environmental monitoring and diagnosis, technical transformation and intelligent control. In 2023, the "Integrated technology and application of low-carbon and energy-saving for cement clinker firing system" independently developed by TCDRI was successfully selected into the "Top 20 advanced and applicable low-carbon technologies in the raw material industry in 2023".

The cement waste heat power generation technology independently developed by Sinoma Energy Conservation Co., Ltd. has been successfully applied in Huaikan South Cement.

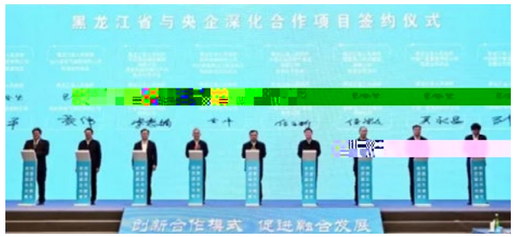
Work together for win-win cooperation

We give full play to the role of the national team and main force in the non-metallic materials industry. Keeping in mind "the top priorities of the country" and creating "the top talents of the country", we adhere to exerting efforts on both basic building materials industry and strategic emerging industries. We accelerate the construction of a modern industrial system, gather multiple forces, and actively carry out strategic cooperation with partners such as governments, enterprises, scientific research institutions and colleges. We innovate cooperation models to achieve a strong alliance and promote complementary advantages, and jointly seek high-quality development.

CNBM signed a cooperation framework agreement with the Heilongjiang provincial government



CNBM signed a strategic cooperation agreement with Tsinghua University

CNBM signed a strategic cooperation framework agreement with China Railway Group Limited

CNBM signed a strategic cooperation agreement with Huawei Technologies Co., Ltd

Strategic cooperation agreements have been signed with various central enterprises

13

10

strategic cooperation agreements have been signed with provincial-level and prefecture-level city governments

12

strategic cooperation agreements have been signed with local state-owned enterprises, large private enterprises, bank and fund institutions, and scientific research institutions and colleges and scientific research institutions and colleges

Help promote the development of the industry

We adhere to open and inclusive development. Actively organize and participate in industry exchanges and research, promote the formulation of industry standards, create an industry ecosystem of value co-creation and win-win cooperation, and boost the high-quality and sustainable development of the building materials industry.

Action · 2023

- Four industry research reports on wind turbine blades, high-purity quartz, aerogel and denitration catalysts were written and formed. The research results of aerogel were successfully applied in Shandong Industrial Ceramics Research and Design Institute.
- The Suggestion of Establishing a Mandatory Commercial Insurance Mechanism for the Waterproofing Industry was adopted by the State-owned Assets Supervision and Administration Commission of the State Council and reported to the General Office of the CPC Central Committee.

Beijing New Building Materials Public Limited Company (BNBM) won the Letter of Thanks from the State-owned Assets Supervision and Administration Commission of the State Council for assisting in the comprehensive improvement of old neighborhoods in central and state organizations

The educator Tao Xingzhi said, 'Hold a heart without asking anything in return.' We treat those children with the sincerest attitude and give all that we have to fill the children's hearts with warmth. We sincerely hope that the children will grow up to be like fireflies, bringing light and hope to those around them while shining themselves.

——Shi Xuejun, from Tianshan Material

I have gained a lot of knowledge and broadened my horizons by attending the Colorful Classroom. Teachers come from all over the world to tell us about the outside world. I am a curious little girl, I also want to see the outside world, I also want to know how big the outside world is, I also want to go to the Yellow Crane Tower in Cui Hao's poem!

——Yuan Zihan, from Kazi Village School, Shouwang Township, Zhaoyang District

Rush to help in emergency rescue and disaster relief

We have proactively fulfilled the social responsibility of the central enterprise, moved at the command and took up the heavy burden to fully support the local earthquake relief and safeguard the lives and health of the people.

Action · 2023

- February 2023: When an earthquake occurred in Turkey, Sinoma Overseas Representative Office in Turkey quickly activated the emergency plan, implemented on-site disposal measures, fully participated in the local anti-earthquake and disaster relief actions, helped to coordinate the anti-earthquake and disaster relief matters, and donated various kinds of living materials through the Disaster and Emergency Management Authority (AFAD) in batches for many times.
- August 2023: When the flooding in Zhuozhou, Hebei Province was serious. Beijing New Building Material (Group) Co., Ltd., urgently carried out flood self-rescue and resuming work and production, gave full play to the advantages of the building materials industry and actively participated in the post-disaster reconstruction of Zhuozhou, opening a channel for product and service delivery, which guaranteed that the best products and service could be delivered to people in need as soon as possible with the lowest price to help the reconstruction of their homes.
- Wangqing County, Yanbian Chaoxianzu (Korean) Autonomous Prefecture was affected by a typhoon and resulted in flood, and Wangqing Northern Rescue Team responded to the "flood" and quickly deployed manpower and material resources to participate in road and river embankment reinforcement and rescue work, and cooperated with the government to dispatch vehicles to transport 31 cars of stones to successfully seal the breach.
- December 2023: When a 6.2 magnitude earthquake struck Jishishan County, Linxia Prefecture, Gansu Province in the middle of the night, CNBM responded positively to the call for assistance to the disaster area, and donated RMB 10 million to Jishishan County at the first time to support the anti-earthquake and disaster relief work.

Communities and Media	Sign public welfare agreements Participate in volunteer activities Daily contact Open day Activities Media interview New media and network platform interaction	Planning affairs Environmental protection and response to climate change Joint construction of a harmonious community Occupational safety and health	Establish and improve safety and occupational health management system Increase investment Timely information disclosure Improve public welfare investment Participate in community activities Promote green production and protect ecological environment
Social groups	Regular participation in meetings or activities Daily contact New media and network platform interaction	Environmental conservation Promote sustainable development jointly	Play membership role Provide economic and technical support Establish a cooperative relationship

Responsibility Sharing

Guided by Responsibility

We actively respond to the policy guidance of the State-owned Assets Supervision and Administration Commission of the State Council on fulfillment of social responsibility by enterprises, and consciously take responsibility for stakeholders, society and the environment throughout the operation, so as to maximize the integrated value of the economy, society and environment and promote sustainable development; At the same time, the Group actively participates in global environmental protection exchanges and cooperation initiatives, provides wisdom and solutions for building a better home for mankind, and demonstrates the responsibility of a state-owned enterprise in the process of globalization.

Action · 2023

- We recognize and abide by the "Ten Principles of the Global Compact" and actively contribute to the achievement of sustainability.
- We take the initiative to share our experience in theories and practice in terms of social responsibility inside and outside the industry and promote the development of social responsibility in China.
- We actively participate in social responsibility sharing and initiative activities in different fields, and participate in launching China Social Responsibility 100 Forum.
- We rely on the China Federation of Industrial Economics, China Building Material Federation, China Building Materials News and other platforms to disseminate ideas, share experiences and launch initiatives, and work with stakeholders to seek better ways of sustainable development.

Driving Development of Supply Chain

We insist on win-win development and are committed to joining hands with stakeholders to make progress together, deepen mutual benefits in areas such as green economy, intelligent manufacturing, new infrastructure, new materials and globalization, strengthen central-local co-operation, national co-development and integration between China and foreign countries, and actively seek to maximize the coefficient of interests for development, so as to create a new situation of mutually beneficial and win-win co-operation.

- CNBM procurement platform is a comprehensive service platform integrating bidding, purchasing and sales, providing supply chain enterprises with procurement sourcing and full-process electronic procurement services, with 100,000+ high-quality suppliers in the building materials industry and 4,000+ registered bid evaluation experts.
- Strengthen the supplier management, strictly select suppliers and cultivate high-quality suppliers, incorporate social responsibility into the supplier evaluation system, and urge suppliers to take social and environmental responsibilities.
- The Platform strictly prevents "black-box operation" in bidding, eliminates commercial bribery and enables honest operations, fair trading and transparent procurement by promoting the integration of e-bidding and e-purchasing, standardization of the bidding process, transparency of the bidding performance and informatization of the bidding management.

Epccl npmaspckclr

- Adhere to green procurement and give preference to environmentally friendly products when purchasing raw materials and clean products when purchasing energy.
- When purchasing daily offices, we give preference to recyclable products and reject excessive packaging.

High-quality Service

We are committed to supplying reliable, green and environmentally friendly building materials, focusing on providing products and service support for the development of the new energy industry, adhering to the concept that the interests of the industry are higher than those of enterprises, deepening the supply-side structural reform, so as to promote the structural adjustment, transformation and upgrading of the building materials industry, and cooperate with industrial chain enterprises in building CNBM into a platform for stakeholders to jointly create values.

- Comprehensively promote the construction and certification of quality management standard system.
- Establish a sound pre-sale, in-sale and after-sales service system, so that customers' inquiries, feedback or complaints can be responded to and properly handled in the first time to improve customer satisfaction.
- Establish a professional customer service team and regularly provide professional technical training for dealers.
- Organize customer training conferences and product promotion briefing to convey basic knowledge of green building materials, precautions for purchasing and using building materials products, and product anti-counterfeiting identification to customers.
- Attach importance to information security, pay attention to protecting customer privacy, and strictly manage customer information.
- Establish a modern logistics park, rationally plan supply and marketing and logistics solutions, reduce resource occupation, and improve sales efficiency.
- Build an online sales platform to provide online trading services for building materials products worldwide and reduce carbon emissions from business travel of customers and sales personnel.

- China National Building Material Company Limited, Tianshan Material Co., Ltd., BNBM, China Jushi, Sinoma Science & Technology, and Sinoma International were selected into the "2023 Comprehensive Strength Ranking of Global Listed Building Materials Companies".
- China National Building Material Company Limited was awarded the title of "Pacesetter Enterprise in China's Industrial Carbon Peaking in 2023".
- China National Building Material Company Limited was awarded the title of "Outstanding Issuer of Corporate Bonds" by the Shanghai Stock Exchange.
- China National Building Material Company Limited, BNBM, China Jushi and Sinoma International were selected into the "Central Enterprise ESG+Pioneer 100 Index" list.
- *Enhancing the Ability of Sustainable and High-Quality Development and Striving to Build a World-Class Materials Enterprise* of China National Building Material Company Limited was selected as an ESG outstanding case.
- China National Building Material Company Limited was selected into the first *Sustainable Development Yearbook (China Edition)* of SPGI and was commended as the "Best Progressive Enterprise in the Industry".
- China National Building Material Company Limited and BNBM were selected into the "China ESG Listed Company Pioneer 100" list.
- China National Building Material Company Limited won seven awards including the best environment, society and governance in the basic raw materials sector of "2023 Asia' s Best Management Teams" by *Institutional Investors*.

- Ten reform achievements of China National Building Material Company Limited and its affiliated companies won the 2023 Outstanding Achievements in China' s Enterprise Reform and Development.
- China National Building Material Company Limited won the awards of the "Best Capital Market Communication" and the "Best Cutting-edge Company of the Year" in the 7th China Excellence IR Awards.
- The project of *Building a Closed-Loop Management System of Large Compliance Supervision Focusing on Risk Prevention and Control for Building Materials Enterprises* of China National Building Material Company Limited won the second prize of the "29th National Enterprise Management Modernization Innovation Achievement".
- China Jushi, Sinoma Science & Technology, BNBM and Sinoma International were selected into the "2023 Top 500 Creditworthy Listed Companies in China".
- China Jushi was selected into "Top 50 Chinese Enterprises in Transnational Operations" list of Forbes China.
- Sinoma International was awarded the title of "2023 Five-Star Creditworthy Enterprise".
- BNBM was selected into the "Top 100 Value of Listed Companies on the Main Board" in the 17th China Listed Company Value Selection by China Securities Journal.
- BNBM was selected into the "Top 100 Health Index of Listed Companies in China" list.

- BNBM, China Jushi, and Sinoma Science & Technology won the "Most Investment-Worthy Award of Golden Bull Award" for the 25th listed companies.
- BNBM and China Jushi were selected as the benchmark enterprises for the state - owned key enterprises of the State - owned Assets Supervision and Administration Commission of the State Council to benchmark against world - class management improvement actions.
- BNBM won the highest award in the sustainable development series of the 2023 Changqing Award of *Caijing Magazine*, the "Sustainable Development Contribution Award".
- BNBM and China Jushi were selected into the "2023 Top 100 ESG Listed Companies in China" list.
- BNBM and Sinoma Science & Technology were selected into the first "Guoxin Cup + ESG Golden Bull Award Top 50 Central Enterprises" list.
- BNBM, China Jushi and Sinoma International were selected into the "CSI Guoxin State-owned Enterprises ESG Growth 100 Index" list.
- Deeply Implementing the ESG Concept and Leading the High-Quality Development of the New-type Building Materials Industry of BNBM and Green Fiber First for Harmonious Development and Building a Demonstration Enterprise for Green Glass Fiber Production of China Jushi were selected into the "2023 Outstanding ESG Cases of Chinese Enterprises".
- Tianshan Material Co., Ltd. was selected into the "2022 Top 50 Sustainable Industrial Enterprises" list of Forbes China.

- *Strengthening ESG Information Disclosure and Promoting the Management Improvement of Low-Carbon Transformation of Traditional Enterprises* of Tianshan Material Co., Ltd. and *Promoting Upgrading and Increasing Efficiency and Fully Imp /of o*
- *CNBM Zambia Industrial Park Helps the "Belt and Road" to Move Steadily and Far of Tianshan Material Co., Ltd., Forging a New Benchmark for the "Belt and Road"* of China Jushi, and *"Illuminating" the China-Pakistan Economic Corridor* of Sinoma Energy Conservation Ltd. were selected into the "Hundred Best Practice Cases of Chinese Listed Companies in Co-building the 'Belt and Road' in Ten Years".
- Tianshan Material Co., Ltd. and Ningxia Building Materials Group Co., Ltd. were selected into the list of companies of "2023 Outstanding Practice Cases of Rural Revitalization of Listed Companies".
- Sinoma International won the "2023 Responsibility Benniu Awarwa
- Sinoma International was selected into the 2023 Yidong ESG+8 "Value 100" list.
- Zhongfu Shenying Carbon Fiber Co., Ltd. won the "2023 Responsibility Benniu Award - ESG Public Welfare Pioneer Award".
- Triumph Science & Technology Group Co., Ltd. won the "2023 Responsibility Benniu Award - Responsibility Rookie Award".
- The international authoritative ranking of China National Building Materials Engineering reached another record high, and it was selected into the "Top 150 Global Engineering Design Companies" for the first time.

Feedback

Dear Readers,

Hello!
Thank you very much for your concern and support for the social responsibility work of China National Building Material Group. Please fill in the questionnaire below, and we will continue to improve and upgrade in the future work according to your opinions and suggestions.

Your evaluation for the annual sustainable development report of China National Building Material Group is:

Overall evaluation of the report: ☐ Very good ☐ Good ☐ Average ☐ Poor ☐ Very Poor

Richness of Content: ☐ Very good ☐ Good ☐ Average ☐ Poor ☐ Very Poor

Suitability of Page Number: ☐ Very good ☐ Good ☐ Average ☐ Poor ☐ Very Poor

Aesthetic Degree of Design: ☐ Very good ☐ Good ☐ Average ☐ Poor ☐ Very Poor

Friendliness of Language: ☐ Very good ☐ Good ☐ Average ☐ Poor ☐ Very Poor

In your opinion, the core of China National Building Material Group's responsibilities is:

☐ Market performance ☐ Scientific and technological innovation ☐ Energy conservation and environmental protection ☐ Employee Care ☐ Corporate Citizenship ☐ Responsibility Management

What aspects of social responsibility management do you think we should further strengthen:

☐ Information Collection ☐ Organization Construction ☐ Personnel Training ☐ Performance Evaluation ☐ External Publicity ☐ Stakeholder Management ☐ Public Welfare Planning ☐ Preparation Level of Annual Report ☐ Research on Social Responsibility ☐ Others

In what way do you prefer to know our information about responsibility performance:

☐ Paper Report ☐ Social Responsibility Column of Official Website ☐ WeChat Official Account ☐ Professional Social Responsibility Media ☐ Others

What do you want to see in the annual sustainable development report of China National Building Material Group?

What aspects of China National Building Material Group's performance do you pay more attention to in the future?

Other comments and suggestions?

From what position did you participate in our solicitation of opinions?

☐ Government departments ☐ Institutional investors ☐ Medium and small shareholders ☐ Financial institutions ☐ Industry associations ☐ Suppliers ☐ Customers ☐ Enterprises in the same industry ☐ Partners ☐ CSR professional organization ☐ Non-profit organization ☐ News media ☐ Middle and senior management personnel of the group ☐ Employees of the group ☐ Others

In order to get contact with you conveniently and respond to your opinions and suggestions in a timely manner, please provide your contact information and relevant information. We will keep it properly and not disclose it to the outside world.
